

GENERAL FEATURES

- Different stroke (measuring) lengths between 0...4000 mm and 0...8000 mm
- Incremental output
- Stainless steel measuring wire
- IP67 protection class
- Compact design
- Easy installation
- 2 m/s maximum speed
- Shock/Vibration resistant
- Aluminum anodized body

AWE 508 series wire encoders convert linear motion into incremental digital pulses. Optionally other resolutions, cable lengths and socket connectors can be requested.

They make measurement by pulling and rewinding stainless steel wire. Usage is practical and usage area is quite wide. By connecting to a counter or position controller, they become a perfect system in high resolutions for position control in wood processing, marble machines, glass processing machines and other machines.

TECHNICAL SPECIFICATIONS

*Stroke Length	Different measuring lengths between 0...4000 mm and 0...8000 mm		Required force	10 N
*Resolution	pulse/mm	mm/edge	Max Output Current	60 mA (per channel)
	5 pulses/mm	0.05 mm	Measuring Type	Optic
	10 pulses/mm (std)	0.025 mm (std)	*Electrical Connection	5 or 8x0,14 mm ² shielded cable M12 / 8 pin socket
*Supply Voltage	5...30V DC ±20%		Materials	Housing: Aluminum/steel /plastic
*Output Signals	A,B,Z (standard)			Measuring Wire: Stainless steel
	A,B		IP Protection Class	IP67
	A,/A,B,/B		Operating Temperature	-25°C ... +85°C
Accuracy	±0.25% FS		Relative Humidity	%95
	2 m/s		Weight	≈2600 gr

Note: The technical specifications indicated by (*) vary according to the selected model. The detailed code table is shown on page 4.

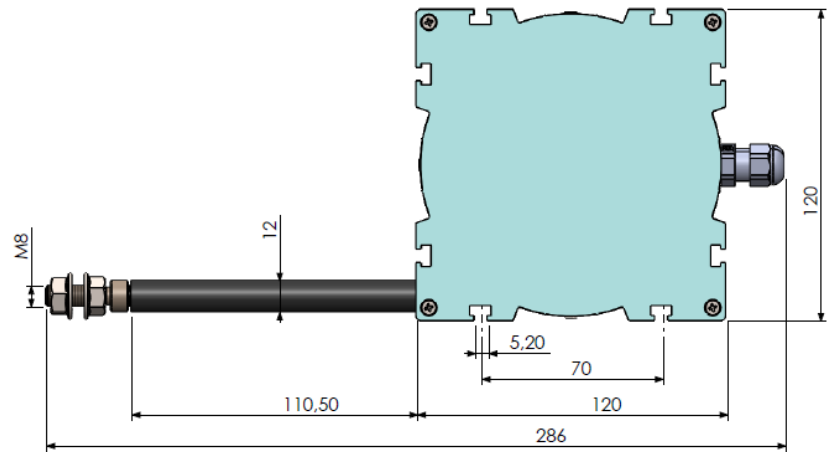

ELECTRICAL CONNECTION

In the right table the cable colors of sensors output signals are given. If the control circuit is suitable in the Line Driver sensors of the not output signals (/A, /B, /Z) have to be added to the system. If it is not suitable /A, /B, /Z signal cables must be fixed as insulated separately. Don't forget that these edges have electricity too.

SIGNAL	CABLE COLOR	M12 SOCKET PIN NO
A	Yellow	1
B	Green	2
+V	Red	3
0V	Black	4
Z	Pink	5
/A	Blue	6
/B	White	7
/Z	Grey	8
EARTH	Silver	-

MECHANICAL DIMENSIONS (mm)

SAMPLE APPLICATION FIELDS

- Elevators
- Press machines
- Crane systems
- Wood processing machines
- Marble processing machines
- Storage positioning
- Dam protections
- Sluice gate control
- Air compressors
- Glass processing machines
- Lifting platforms
- Applications in medical technologies (operating table etc.)
- Forklifts
- Screw machines
- Paper machines
- Sewing machines
- Hydraulic machines
- Sheet metal machines
- Printing machines
- Horizontal control equipments
- Construction machines
- Industrial robots
- Injection machines
- X-Y axis displacement
- Liquid level measurements and position control

MOUNTING AND WARNINGS

1. Never release the wire after pulling. Otherwise, the coil spring will be damaged.

2. Mount the sensor according to the mounting directions shown below.

3. If there is a trickle of water (like a rain), the wire outlet must not be a drip of water upstream. If needed please use guide rollers.

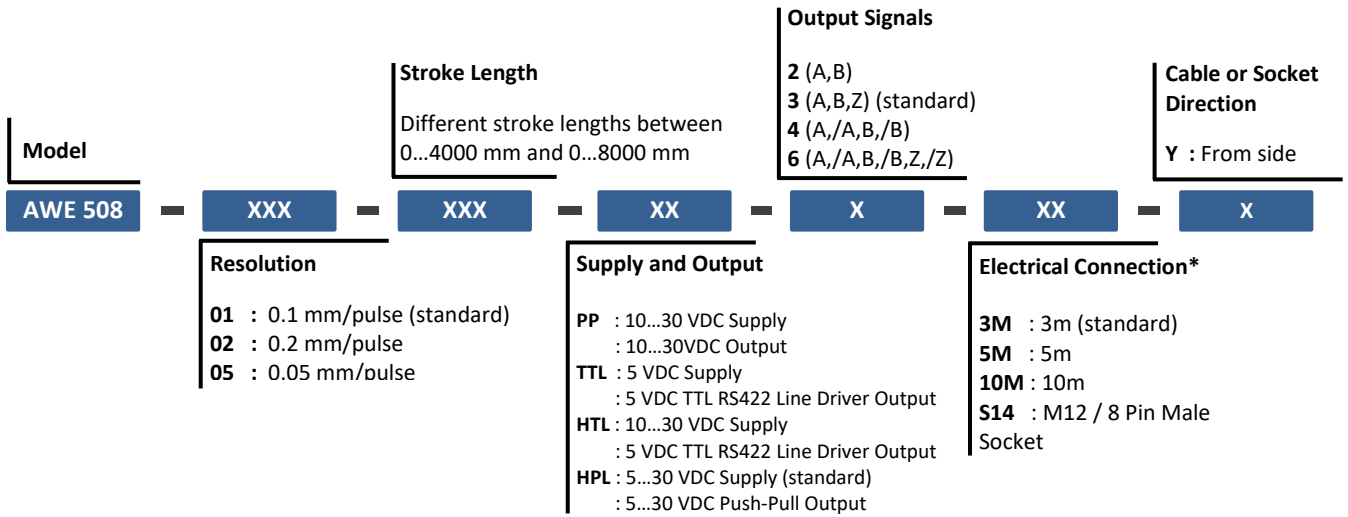

4. The wire should not be pulled in angular. If needed, please use guide rollers.

Important Note(!): Failure to comply with these recommendations, the malfunctions that may occur will not be under the warranty.

PRODUCT CODE
