

- Contactless and Wear-Free System
- High Tolerance to Shock and Vibration
- Measuring Lengths of Up to 20 Meters
- Resistant to Dirt, Humidity and Dust
- Requires No Cleaning or Maintenance
- Robust Shielded Metal Enclosure
- Protection Class IP67
- Compact Design

The encoder forms a compact unit. The scanning unit is guided within the housing along scale.

Long life linear motion guide system. The scale, scanning unit and guide are protected against contamination by an aluminum extrusion and elastic sealing lips.

The coupling elements between the scanning carriage and transfer web are designed to transfer motion in the measuring direction only.

Pitch or other motion of the connecting web in a direction perpendicular to measurement is compensated without affecting accuracy.
